Additional Info

There are ten different styles of alphabets throughout the sampler

Polychromatic

All alphabets (*with the exception of three*) are worked with an overdyed thread containing your favourite colours plus twelve solid dyed colours throughout the sampler.

How to choose complementary solid colours:

- * Work a row or two of Cross Stitches or Satin Stitches with the overdyed thread
- * Choose solid colours that you think tone/match the various colours in the overdyed thread
- * Work about two rows of ten stitches of each colour - noting on paper the colours & the sequence in which they were worked
- * From your stitched test samples, chose those that are the closest to those in the overdyed thread and are most pleasing to your eye

Monochrome

The complete sampler is worked with two toning DMC Stranded Cotton colours - one dark and one lighter.

How to choose complementary solid colours:

- * Work a row or two of Cross Stitches or Satin Stitches with each thread colour (noting on paper the colours & the sequence in which they were worked)
- * From your stitched test samples, chose the two toning colours that look the best together and therefore are the most pleasing to your eye

Note: Instructions will be given for both polychromatic and monochrome choices as per the original samplers
